Fasteq Ltd

Fasteq Ltd is a supply chain solution specialist for Primes and sub contractors within the Aerospace and Defence Industry and supports BAE Rochester's site by providing an On-Site-Stores Management Facility for C Class components. We have been awarded consecutive Silver Supplier Status Awards over the past year.

Fasteq are AS9120 accredited and have over 75 years experience in the management of C Class product. We have excellence and core competency over a far greater product range so can therefore take a formulaic approach to provide a true "Supply Chain Management Solution". (Please see our website for details or request a catalogue on 01506 841230)

Our Supply Chain initiatives are based on our Customer's individual needs and truly add value to their business. We understand and adapt quickly to changing demands and are continually involved in developing innovative new solutions with our customers.

Striving toward a goal of zero defects and 100% RFT and OTD, Fasteq will achieve SC21 Bronze Status in early 2012. Making Fasteq the first specialist Class C & Fastener company to do so.

Fasteq provide value added service by inspecting and certifying all Stainless Steel Fasteners and Machined parts using XRF technology and hardness testing. This service has proved to be invaluable to our customers given the level of accuracy and traceability required.

Only recently **Dr Guiseppe Marazaroti, Chairman of the EIFI Stainless Steel Fastener Group** was so concerned about the poor quality of fasteners within the European Union that he made these comments in the Fastener Industry Trade Magazine:

"Obviously, sub standard steels are being used in the manufacture of fasteners which clearly do not comply with the standards inferred by their head markings A2-70, A4-70/80. The importers of these screws need to be aware of their

liabilities in case of product failure and buyers need to be on their guard for such fraudulent products"

The Fasteq Certificate of Conformity gives the customer total piece of mind. Does your Fastener supplier provide this?

Services provided by Fasteq include: Vendor Managed Inventory, Kitting Services, Ultrasonic Cleaning, Customer On-Site-Stores Management and various other Customer led initiatives. Give Fasteq a call to find out how we can improve your Supply Chain.
